## **Roller Track Refurbishment and Up-Grade Kits**

**Change from this**

**To this**

**The Refurbishment and Up-Grade Kits come with a 5 year component warranty.**

In these difficult times it can be nigh on impossible to justify installing a new system into used vehicles even if the existing equipment is not performing or is defective. Jammed or non retracting rollers can be a safety hazard that could cost you more than just cash.

To address this situation Rollerbed Systems have introduced their new Refurbishment and Up-Grade kits to give old and tired Pneumatic Roller Track systems a new lease of life by restoring them to a fully serviceable condition. If you have an old or well used system that is in need of repair or reconditioning it can now be economically restored to a newly new condition. The kits are interchangeable with most 2" roller systems even from other manufacturers. Each module kit come complete with new top plates, logo plate, roller channels incorporating the latest and more robust rollers, together with the requisite number of top plate screws. All you have to do is remove the existing parts, clean out the main channels and drop in the new components; finally torque down the screws. Servicing a pneumatic roller bed system has never been easier or cheaper. Other system related components such as control boxes and pallet stops are available on a replacement basis.

Call us now to hear how cost effective the Rollerbed Systems LLC refurb kits are in bringing that old system to back life, quickly and economically.
